

Rama ganith Tatipakala

Aspiring ServiceNow Developer

📍 Hyderabad, India ✉ ramaganith@gmail.com ☎ +916281512046 [in LinkedIn](#) [🔗 GitHub](#)

SUMMARY

Electronics and Communication Engineering graduate with 1+ year of experience as an Investigation Associate at Amazon. Hands-on experience in ServiceNow through developing Expense Approval & Audit Management System. Skilled in ServiceNow, SQL, JavaScript, Python, and Git. Seeking an entry-level ServiceNow Administrator and Developer roles to apply and expand my technical skills.

EDUCATION

Aditya University

B.Tech

Electronics and Communication Engineering

Surampalem, 2020- 24

- Coursework: Object Oriented Programming Systems, Database Management Systems (DBMS)
- Focused on applying academic concepts to real-world backend and systems engineering problems

PROFESSIONAL EXPERIENCE

Amazon

Hyderabad

Investigation Associate

Mar 2025 - Jun 2026

- Reviewed and investigated customer and account-related cases by following company policies, SOPs, and operational guidelines.
- Analyzed transaction patterns and account activities to identify suspicious, fraudulent, or non-compliant behavior.
- Handled approximately 150–200 cases daily while maintaining accuracy and adherence to SLA and quality standards.
- Prepared investigation documentation while ensuring SLA compliance, SOP adherence, confidentiality, and operational accuracy.

PROJECTS

Expense Approval & Audit Management System (EAAM)

Technologies: ServiceNow, UI Policies, Data Policies, ACLs, Reports, Dashboards, Knowledge Base, Service Catalog, Service Portal, Git, GitHub

- Designed and developed a custom ServiceNow application to automate the employee expense reimburse lifecycle, including request submission, manager approval, finance verification, and audit tracking.
- Built custom tables with parent-child relationships, implemented UI Policies, Data Policies, ACLs, reports, dashboards, update sets, and comprehensive project documentation following ServiceNow best practices. Configured role-based access for Employee, Manager, Finance, and Administrator users while ensuring
- data validation, security, and workflow transparency.
- Configured a Knowledge Base with categorized articles and FAQs, and enabled Contextual Search to improve employee self-service and application usability.
